Over 35,000 top name chain and private pharmacies to choose from.**Rx Card Advantages - Savings of 10% - 65%:**

- Savings Average between 18% to 25% off regular prices at walk in pharmacies
- Savings at Point of Purchase
- No Income or Health Restrictions
- No Waiting Periods
- Immediate Savings on Generic and Brand Name Medications
- No Limit on Usage
- Family Card Includes Dependents
- No Claim Forms

Using your WALK-IN Pharmacy card:

- A. Locate a convenient pharmacy from the list on this page.
- B. On the ID# line, insert any unique 9 digit number, which will become your ID#. Do not use your social security number.
- C. Present your Rx card on each visit to insure you will receive best pricing on all your brand and generic drugs at the point of purchase. Some local pharmacies may already be pricing their high volume prescriptions with significant discounts, so in some cases you prescription cost may not be less than before. You will always pay the lowest price available each time you buy your medications. Your local pharmacy cannot give you plan price quotes over the phone.
- D. If you currently have another Rx card, you may ask your pharmacist to compare best available pricing at the time you are filling a prescription. Rx programs may not be used together for same purchase. Use this Rx card for yourself, dependents, parents, and grandparents.
- E. Your pharmacist cannot give you pricing until you present your card at the pharmacy, nor can our Member Service Number provide you with pricing for the Walk-In Pharmacy.

Participating pharmacies include:
